Clay Play - How to Make a Pinch Pot

1. Roll your Play-Doh into a ball
2. Stick your thumb into the middle of the ball.
3. Gently pinch the Play-Doh between your thumb and index finger.
4. Turn your pot a little bit and pinch again. Remember to pinch a little each time & not too hard. As you work your way around the pot, the hole in the middle will get bigger, and the sides of your pot will get thinner.
5. When your clay starts to look more like a bowl & less like a ball of clay, flatten the bottom & adjust the shape the way you want.
6. Note: Play-Doh is designed to be used over & over again. Your piece will most likely crack if you allow it to dry and harden.
7. Store your Play-Doh in an air-tight container to reuse for other activities later.
